

PALOMAR ENERGY PROJECT (01-AFC-24) CEC STAFF DATA REQUEST NUMBER 51	
Technical Area: Soil and Water Resources	Response Date: April 8, 2002

REQUEST:

Provide a draft stormwater and an erosion/sediment control plan for the facility and associated linear facilities that includes the following:

- A. Map drawings of 1"=100' or less that depict existing and proposed topography (contours) with labeled elevation numbers, structures, facilities, staging areas, and soil stockpile areas on the drawings (both on-site and off-site);
- B. Best Management Practices and a construction sequence on the drawings;
- C. A complete mapping symbols legend on the drawings;
- D. On-site stormwater calculations in the narrative;
- E. Address procedures that will be used to handle potential construction runoff impacts; and
- F. Maintenance and monitoring protocol for erosion, stormwater runoff control and stabilization procedures.

RESPONSE:

Attachment 51-1 is a preliminary draft Stormwater and Erosion/Sediment Control Plan. More complete and detailed project design data is not yet available. As noted in the Committee Scheduling Order, additional information is expected to be available during the City EIR process.
